Analytical Supply Chain Consultant with expertise in procurement optimization, data modeling, and supplier strategy. Achieved \$12.5M in savings through SQL/Python analytics, BI insights, and market based negotiations to uncover inefficiencies and strengthen sourcing decisions. Experienced in supplier negotiations and on-site plant evaluations to identify strategic fit and operational improvement opportunities.

WORK EXPERIENCE

Gibson Consulting | Chicago, IL

Consultant, Supply Chain Operations & Procurement Strategy

Jun 2024 – Oct 2025

- Implemented procurement strategies that generated \$11.0M in savings for 2 commodity categories.
- Delivered \$1.5M in operational efficiencies across multiple geographies including negotiated adjustments in payment terms, adjustments in on-site and remote engineering resources, delivery terms, warranty claims and sustainability.
- Partnered with executive leadership and cross-functional teams of operations, finance, procurement, and logistics to align supply chain initiatives with enterprise objectives.
- Managed multiple parallel sourcing workstreams across regions, balancing analytics, supplier management, executive reporting, and on-site evaluations.
- Conducted 5 client trainings, including executive communication, plant site visit trainings, market research trainings, and negotiations trainings allowing clients to be efficient and effective throughout the sourcing transformation process.
- Led data analysis for strategic sourcing initiative encompassing 3,000 unique SKU's, 150 suppliers, & 1,000,000 rows of data. Built & maintained models incorporating changing scenarios and provide real-time insights to executives through Power BI dashboards.
- Lead 24 in depth market-based negotiations across 3 separate geographies while managing current client relationships with key suppliers.
- Lead 30 international internal and external site visits and plant visits.

Michigan State Research Laboratories | East Lansing, MI

Research Assistant

Dec 2020 – Jun 2023

- Applied rigorous laboratory best practices including precise reagent handling, thorough documentation, and adherence to safety and data integrity standards, while conducting research on pharmaceutical-oriented catalysts and determining absolute stereochemistry using Exciton Coupled Circular Dichroism (ECCD).
- Designed Linux based system workflow pipeline for Humann 3.0 software in tuberculosis genetic research.
- Explored potential bio-organic reactions, analyzing scientific literature to inform studies.
- Defined comprehensive laboratory procedures that streamlined workflows and ensured consistency across 50+ reproduced experimental trials, improving efficiency and reliability in catalyst research.
- Committed to safety and adhered to strict protocols when handling hazardous substances.
- Synthesized scientific findings into concise and compelling presentations and papers to attract potential donors.

Silver Beach Pizza | St. Joe, MI

Bartender/Server

May 2018 – May 2024

- Delivered exceptional customer service by addressing diverse client needs and fostering positive experiences.
- Employed strong communication skills to recommend menu items, upsell premium products, and increase revenue through strategic sales techniques.
- Consistently ranked among the top 5 earners out of 100 staff members, generating approximately \$100k in monthly sales revenue while serving an average of 100 customers per day.
- Managed daily operations, including inventory restocking, maintaining cleanliness, and equipment setup, demonstrating organizational and operational efficiency.
- Handled challenging situations and resolved customer concerns professionally, showcasing problem-solving and adaptability.
